STOREFRONT PALETTE

Ten storefronts, edge-to-edge, alternating rooflines for a real streetscape. Each business gets its own color — the one place in this system where more than one accent is intentional.

USE IT WELL

• Do

- Keep "Acquire" and "local" the same weight — no italics, no re-coloring.
- Let the storefront row touch edge-to-edge; it reads as one streetscape, not separate icons.
- Use the reverse/mono variant on photos or dark backgrounds (once produced).
- Give the mark clear space roughly equal to the cap-height of "A."

• Don't

- Don't add a second accent color to the wordmark — slate blue is the only one.
- Don't stretch, skew, or add a drop shadow or outline.
- Don't separate the storefronts with gaps, or reorder them arbitrarily.
- Don't shrink the full lockup below ~2.5in wide; use the wordmark alone at small sizes.
